

# Some spring flowers are showing

Last fall I planted lots of new blue purple crocus bulbs. Some are starting to show their blooms but it seems that something ate the bulbs again. Something is eating the lilies bulbs in the flower garden as well. Evidence of holes where a critter went after the bulbs are evident. Have sprayed the tulips to discourage the deer in hopes that there will be tulips in a little while since there are lots of green leaves. The daffodils are in full bloom in all locations.
