

KWIK theme released for ThriveThemes

I am so excited! The new **KWIK** theme has been released by ThriveThemes on November 17, 2021.

Kwik is a WordPress theme for Thrive Theme Builder made by Thrive Themes.

This means it has **a conversion focus at it's core!**

Now off to update and switch out site to this theme!!

If you don't have Thrivethemes you really should consider getting it to have in your web design/web building toolbox. It is hands down the best way to create web sites.
